Versions

Technical Construction Details

PLATFORM

A **stainless steel, anti-magnetic** structure supports a specially treated base to set up a turntable or other components. Different versions and materials are available. Check **Accessories brochure**.

STAINLESS STEEL TOP ATTACHMENTS ON RACK UPRIGHTS

Each top is made with **conical recess** to support the spikes of the turntable platform.

EXTERNAL STRUCTURE

It's made of metal filled with special particles and elastomers. The uprights have a **diameter of 45 mm**. These factors create a rack heavy, resistant and stable. The resonance coefficient of the structure is significantly lowered. The paint used is textured for diffusion purposes.

INTERNAL SUSPENDED STRUCTURE

Isolated from external structure. **Eliminates vibrations** that are transmitted from solid and acoustic sources through the creation of decouples; steel needles supported on isolating discs. These provide extra tiers of **anti-resonant protection**. This suspended audiorack has a **triple decoupling**.

TEFLON CILINDERS

Support the internal structure and isolates from the external structure. (**Diameter 30 mm**)

EARTH TERMINAL

To connect electronics (essential for phono) Check manual to connect properly if is necessary.

BRIDGE BAR

Height variable rear rods strengthen the external structure to guarantee stability and ensure **free easy access to install components**.

INTERNAL FRAME

These frames are **adjustable in height** to place any size of component properly. They are locked on the vertical stainless steel bars of the suspended structure.

LINEAR ARMS

Arms made from anti-magnetic stainless steel. The arms hold adjustable spikes (can be located in different positions) also support isolating discs and damping pads. **Total flexibility in different positions and easy to change.**

This system allows to set up the best support position to place electronic components.

ISOLATION DISCS & DAMPING PADS

Support the electronic components (without any need for shelves). Easy installation facilitated by an elastic insert which provides **stability** to place electronic components on the adjustable spikes.

DECOUPLING BASE

Stainless steel discs support the spikes of the uprights. Two types of floor pads are included, with different sonic behavior, depending on the room acoustics. **Check manual to use the proper pads for the bases.**

Accessories included

Dampers.

Special anti-magnetic & anti-vibration damper **STANDARD 1,4 kg.** in each level for each electronic component. Avoid parasitic vibrations and radio frequency interference in digital systems.

Optional accessories (check accessories catalog for more options)

Glass shelf

Floor plate arm

Turntable plate arm

Any special & custom version upon request

All racks are shipped 95% assembled

ARTESANIA AUDIO

the high end rack company

“ Artesania Audio means exceptional quality and technology ”
(ALTA FIDELIDAD, Spain)

“ Parasitic noise disappears completely and a beautifully clean sound is the result ”
(HAUTE FIDÉLITÉ, France)

“ Artesania racks extract every last drop of potential from the components it supports ”
(HAUTE FIDÉLITÉ, France)

***“ The perfect rack? There are no shelves to flap about under your equipment,
its arguably the best equipment support known ”***
(HI-FI NEWS, UK)

***“ Artesania Audio wants components to sound like themselves (in mechanical isolation),
Blue Moon Award for Rack ”***
(SIXMOONS, Switzerland)

***“ Incredibly neutral, the overall solidity and control of my system,
Most Wanted Component award ”***
(STEREO TIMES, USA)

***“ Music Sounded bigger, better recorded, you could hear more into the recording and
the frequency extremes were as effortless and natural as the mid-band ”***
(HI-FI +, UK)

***“ The Artesania Rack possesses the ability to improve the overall sonic performance of
any separate component or system as a whole ”***
(ENJOY THE MUSIC, USA)
